YOU PAID WHAT?!

A Workshop On Full Cost Accounting Methodology For Information Technology Projects In The Public Sector

WHY SHOULD I GO?

Budgets, Time, Value: Is Your Team Better Than Average?

How much better than the "industry average" would your IT project teams have to be to deliver results on time, within budget, and with all the requested features? Broad industry surveys, interviews and workshops with IT executives show the following averages:

Less than one sixth of IT projects (16.2%) are considered "successful" by IT executives. Success is defined as the project being completed on-time and on-budget, with all the features and functions initially specified.

Over half of IT projects (52.7%) are considered "challenged".

This refers to projects that are completed and operational but over-budget, over the time estimate, and/or offering fewer features and functions than originally specified.

About a third of all IT projects (31.1%) are labeled "impaired".

These projects were canceled at some point during the development cycle.

Almost a third of the "challenged" and "impaired" projects experience:

Cost overruns of 150% to 200% (averaging 189% of their original cost estimates)

Time overruns of 200% to 300% (averaging 222% of their original time estimates)

Source: The Standish Group TSG, Massachusetts, "CHAOS Study"
<http://www.standishgroup.com/chaos/intro1.php>

WHO SHOULD ATTEND?

You are a senior information technology manager or architect who guides the informatics direction of your organization.

You are an accountant or financial analyst responsible for preparing departmental estimates, budgets and business cases for information technology projects and renewal.

You are a procurement officer who assists with information technology acquisition criteria, processes and contract.

WHAT IS FULL COST ACCOUNTING?

Instead of making information technology purchasing decisions on the basis of a single-project cash-flow, FCA provides a framework to assess value-for-money from an enterprise perspective, and when appropriate, in consideration of the wider community. It provides a structured way for executives, managers and other stakeholders to communicate about enterprise-level Return On Investment (ROI), as well as about positive or negative "externalities". Furthermore, when FCA is applied to competitive cost-per-point procurement processes, it will typically present a more competitive environment for a wider range of suppliers, compared with contract-by-contract criteria.

FCA IN GOVERNMENT

In both Canadian and European governments, FCA has been engaged by environmental departments and agencies for improving ecological accountability and sustainability. In the US, the White House Office of Management and Budget has been encouraging agencies to adopt FCA since 1991. Several that have implemented FCA in recent years (Justice, Labor, Environment <http://www.epa.gov/fullcost/principi.htm>, Veterans Affairs, and NASA, among others) are reporting that managers are able to make more informed and prudent decisions about their programs, because they better understand and track their full costs.

In 2003/04, FCA methodology in the field of information technology (IT) is still in its formative stages, and the concept remains unfamiliar to most IT professionals. But the multi-billion dollar scale and aggressive momentum of information technology maintenance cost have led to worldwide demand for greater accountability in IT

decision-making, recovery of financial control over IT, and more realistic appraisal of the returns on IT investments.

The "You Paid What?!" workshop on FCA methodology is a mutual learning event involving IT and accounting professionals interested in measuring and managing the full costs of IT decisions.

This series of sessions offers a fast-paced, participatory, and results-based event that is driven by current priorities in applied FCA in the public sector. Genuine case studies will be used to help participants to articulate the issues to be resolved, and to identify solution options. Participants will come away with state-of-the-art knowledge that will be immediately applicable to designing and implementing better financial reporting and management for IT projects within their respective organizations!

A Workshop On Full Cost Accounting Methodology For Information Technology Projects In The Public Sector

RELATED TOPICS IN THE NEWS

"One of the key objectives of this government is to restore Canadians' trust - and to do that we need to show Canadians that we treat their tax dollars with respect and care," said Minister Alcock.

The government will achieve the \$1 billion in annual savings through reallocation that was outlined in Budget 2003. The President of the Treasury Board has been tasked with meeting this commitment.

In addition, cabinet's Expenditure Review Committee - to be chaired by Minister Alcock - will conduct an extensive and rigorous review of all government spending, to report in autumn 2004 for implementation in the 2005 budget.

The review will create a cycle of continuous management improvement and the pursuit of excellence in the public service. Resources will be reallocated from the old to the new, from the good to the better. The committee starts work tomorrow.

"This will help foster a new management culture in government," Minister Alcock said.

TECHNOLOGY SHOWCASE & ROI "SHOW & TELL" MARCH 9TH & 10TH 2004

The technology showcase will run for the first two days of the learning event and is offered to public sector employees free of charge. Access is not contingent on participation in the learning event portion of the program, however a limited number of passes will be issued. Eliminating the common pitfalls of industry tradeshow, this is your opportunity to meet solution providers from:

- Internal government resources

- Open Source suppliers
- Proprietary suppliers

As part of the Technology Showcase solution providers will be given the opportunity to participate in the ROI "Show & Tell". The purpose of the ROI "Show & Tell" is not to only provide a technology demonstration, but to discuss the hard 'value' questions you need answered.

A Workshop On Full Cost Accounting Methodology For Information Technology Projects In The Public Sector

PRE PROGRAM FOCUS SESSIONS

FOCUS SESSION **A** TUESDAY, MARCH 9, 2004

SOME GOOD QUESTIONS FOR FCA TO ANSWER: FOUR CASE DISCUSSIONS

8:30am – 12:00pm

CASE 1: ASSOCIATED MANAGEMENT COSTS

What is a reasonable way to take account of these costs right up front at the procurement stage, as well as during ongoing financial monitoring and management?

CASE 2: SELECTION CRITERIA RELATING TO INTELLECTUAL PROPERTY ACCESS

Can and should some of the comparative assessment criteria in the procurement process also value costs to the Government associated with the intellectual property and code restrictions of a proprietary solution, compared with the government's 'free/libre' access to use of the the intellectual property and programming code of an open source option? If so, how?

CASE 3: BENEFITS OF COST-SHARING

From the point of view of a Canadian Government agency, how might post-

project cost sharing have been anticipated and quantified in an original project plan? How might the benefits of such 'resource amplification' be evaluated now?

CASE 4: LIABILITY WHEN THINGS GO WRONG

What are some working rules by which such costs should be formally estimated, and how should these be accounted for in the Government's financial records?

Your Focus Session Facilitator: Mr. Joseph Potvin is a senior economist and IT architect, serving as a member of the management team for the Standards, Architecture and Security Sector, IT Services Branch, in Public Works and Government Services Canada. Prior to joining PWGSC, he worked internationally as a consulting economist in twenty countries, and at several divisions of the World Bank. His primary work for more than a decade has been on full cost accounting technical analysis and application for executives and managers.

FOCUS SESSION **B** TUESDAY, MARCH 9, 2004

HOW TO CONDUCT EFFECTIVE COST ESTIMATING FOR BETTER PROJECT MANAGEMENT OF YOUR IT IMPLEMENTATIONS

Deloitte.

1:00pm – 4:30pm

- Almost 33% of IT projects are labeled "impaired".
- Over 50% of IT projects are considered "challenged".
- Less than 17% of IT projects are considered "successful".

Why?

Most of these statistics point to a common problem early in the project management cycle and that's an inaccurate estimation of costs. Some may say that this is a problem inherent with estimation because you are essentially guessing; how can you possibly be right all the time? And you are right; it's not possible to be 100% accurate. But there are methods you can employ to ensure the cost estimations you make are better, giving you the ability to better manage your IT projects.

In this highly practical and interactive focus session you will learn techniques to effectively estimate the costs of your IT project up-front and methods to determine which technique is better suited for your project.

Join the experts of Deloitte as they ensure you will be better equipped to manage your IT projects more effectively and be able to bring up industry IT project statistics.

About Your Focus Session Facilitator: Mr. Abhay Raman is a Manager in the Ottawa office of Deloitte. He is a senior practitioner with significant experience in IT architecture, strategy and planning. He has helped organizations in North America, Europe & in the Asia Pacific region with IT Architecture planning, CRM, Identity Management, Portals and Information Management. He is a proficient, experienced project manager, well versed in effective project estimation with extensive experience in the full life cycle of application development, requirements definition through package & custom implementations. Mr. Raman has also tenured as a part time professor of Management Information Systems at Carleton University in Ottawa - Canada. He has presented at various events in North America and Asia.

A Workshop On Full Cost Accounting Methodology For Information Technology Projects In The Public Sector

MAIN AGENDA – Wednesday, March 10, 2004

8:30 Chairperson's Opening Address
Michael Tinkler
Society Of Management Accountants

8:50 KEYNOTE OPENING ADDRESS

Michael Turner Assistant Deputy Minister, Telecommunications and Informatics Program Branch (TIPB) , Public Works & Government Services Canada (PWGSC) is responsible for guiding PWGSC's information technology services to the rest of the Federal Government. Mr. Turner will comment on the expected operational impacts of engaging full cost accounting methods for public sector decision-making on information technology.

9:30 SPECIAL PROGRAM HIGHLIGHT

James (Jim) H. Johnson is Founder and Chairman of The Standish Group, which has come to be known for its high quality, independent primary research, analysis conducted through focus groups, in-depth surveys and executive interviews. Mr. Johnson will discuss highlights of the latest edition of the CHAOS Chronicles, which condenses nine years of groundbreaking research on project performance of over 40,000 completed IT projects. www.standishgroup.com

10:15 Networking & Refreshment Break

10:35 Developing An Approach For Evaluating Software Quality Prior To The Purchase

One of the biggest problems with software acquisition is that you often don't get what you thought you were buying. However there are simple techniques and checklists that you can employ to ensure that the products you are buying are of the highest quality and will not present additional costs or higher exposure to risk for your department. This work session is dedicated to providing you with a model for measuring software quality, which will also provide you with valuable information you may need in a Full Cost analysis. You will be joined by Dr. Khaled El Emam to learn about:

- The quality of software you can expect today and budgeting for that
- Evaluating the internal costs associated with deployment beyond acquisition
- Checklists, criteria, decision aids and tools for product evaluation

Dr. Khaled El Emam

President

Ottawa Software Quality Association

11:20 Section Analysis

Utilizing topical experts, or expert facilitators delegates will be guided through an interactive discussion to enhance program connectivity, identify general themes, and apply themes to relevant situations.

12:05 Networking Lunch

1:15 Full Cost Accounting – Principles & Practice A U.S. Government Perspective

As part of President Bush's management agenda the United States is focussing on budget performance integration. In order to accomplish this, you need to understand your costs. One of the methods for accomplishing this feat that the U.S. Government promotes is a full cost accounting methodology. Two organizations that are employing this methodology is NASA and the Small Business Administration, however each approach it differently. One employs a surveying approach of the different business lines, while the other employs an attribution approach. You will learn from Lloyd Blanchard about:

- Understanding the principles of FCA and the different methods of utilizing it

- Applying each method at an organizational level
 - Applying each method in an information technology approach
- Lloyd Blanchard**
Senior Advisor, Financial Management
NASA

2:00 Understanding The Implications Of Employing A FCA On The Procurement Process

Have you ever wondered why the procurement process takes so long? At the end of the project, have you ever wondered whether you won or not? More often than not it reflects the difficulties of managing the procurement of an IT solution without fully managing the expectations of the business requirements and objectives. Many times there is a lack of a quantifiable definition of success. Too often the business case is incomplete or does not provide the answers necessary for gaining contract approval. The Business and IT Solutions group within the Acquisitions Branch of PWGSC is not only dedicated to helping organizations answer the necessary questions, but helping them understand why it is important to answer them. Employing a FCA approach will not only allow you to make better purchasing decisions, it will ultimately improve the purchasing process, making your life a lot simpler. You will learn from Ted Purnell about:

- Improving accountability and reducing risk with IT purchases
- Facilitating the purchasing approval process to shorten the amount of time to implementation
- Improving communication with senior management to increase support for initiatives

Ted Purnell

Manager, Business & IT Solutions

PWGSC

2:45 Networking & Refreshment Break

3:05 Demonstrating The Long-Term Impact Of Employing FCA For IT

In 1996/97 the Administrative Information Systems (AIS) branch of UCLA embarked on an exercise to essentially measure the value of IT as it related to the different business lines it serviced. The purpose was to essentially eliminate the "black box" perception of its services. In doing so AIS was able to ascertain the value of each component of any given project, resulting in a baseline for its current production portfolio. After some inspection AIS realized that this "baseline" could also be used as a basis for predicting the full cost of proposed projects, which were not previously accounted for when an organization was in the decision phase of project development. The end result is a full cost accounting approach that has demonstrated benefits far beyond making more responsible IT development decisions. You will learn from Judith Freed about:

- Predicting all the associated costs with IT development projects
- Minimizing the impact of organizational cost-cutting
- Developing better relationships with the business lines you service

Judith Freed

Business Applications Manager

UCLA

3:50 Section Analysis

Utilizing topical experts, or expert facilitators delegates will be guided through an interactive discussion to enhance program connectivity, identify general themes, and apply themes to relevant situations.

4:35 End Of Day

**YOU PAID
WHAT?!**

A Workshop On Full Cost Accounting Methodology For Information Technology Projects In The Public Sector

POST PROGRAM FOCUS SESSIONS

FOCUS SESSION **C** THURSDAY, MARCH 11, 2004

HOW TO QUANTIFY THE OF VALUE IT FOR YOUR ORGANIZATION

8:30am – 12:00pm

Organizations like yours have complex IT systems. Merely maintaining them is a huge job. So when your management announces that they now want hard figures on how to control IT costs and projects, it presents huge challenges for your IT department. If this sounds like you...

One of the biggest challenges your It department is facing these days is to undertake an analysis of all your IT systems, procedures, partners, and processes in order to justify and make IT a valued service centre.

In this workshop we will work together to build a value model. Using cases and tools we'll create ways to:

- Demonstrate IT value and contribution to stakeholder values
- Encourage management to view IT as an investment and not a cost center
- Measure and budget IT investment returns

We will also review some proven management strategies and case studies. In an effort to address and discover this 'holy grail' of the IT

universe, we will explore a few fast track solutions focused on:

- Full Cost Accounting
- Total Cost of Ownership
- Risk Assessment
- Return On Investment

Join your colleagues at this exciting workshop that will employ a unique approach, with an eye towards reducing dependence on outside consultants.

About Your Focus Session Facilitator: Mr. James (Jim) H. Johnson is the founder and chairman of The Standish Group. He has been professionally involved in the computer industry for over 30 years and has a long list of published papers, articles and speeches. He has a combination of technical, marketing, and research achievements focused on mission-critical applications and technology. He is best known for his research on transactional middleware, as well as project and system failures. Jim is a pioneer of modern research techniques and continues to advance in the research industry through virtual focus groups and case-based analytical technology.

FOCUS SESSION **D** THURSDAY, MARCH 11, 2004

HOW TO EVALUATE OPEN SOURCE SOFTWARE IN ORDER TO ACCURATELY COMPARE IT TO ALTERNATIVES

1:00pm – 4:30pm

Open Source Software / Free Software (OSS/FS) has risen to great prominence. Briefly, OSS/FS programs are programs whose licenses give users the freedom to run the program for any purpose, to study and modify the program, and to redistribute copies of either the original or modified program (without having to pay royalties to previous developers). Many quantitative studies have shown that, in many cases, using OSS/FS programs is a reasonable or even superior approach compared to their proprietary competition.

The challenge for you is how do you effectively conduct an analysis that will allow you evaluate and compare all of your options regardless if it is Open Source or proprietary. Well, the basic steps for evaluating all programs, both OSS/FS and proprietary, are essentially the same:

- **Identify** what your options are
- **Review** existing evaluations
- **Compare** attributes of your options to your needs. Important attributes include functionality, cost, market share, support, maintenance, reliability, performance, scalability, usability, security, flexibility, and legal/license issues
- **Analyze** the top contenders, examining these attributes in more detail

However, the way that you perform these steps in an evaluation is different for OSS/FS programs than for proprietary programs. A key difference for evaluation is that the information available for OSS/FS programs is usually different than for proprietary programs.

This workshop will provide you the basic tools you need to conduct such an evaluation considering the fundamental differences in the information you collect. Furthermore, utilizing the basic approach outlined above, you will examine the necessary components under each section that will allow you to tailor your evaluation to needs of your organization.

Your Focus Session Facilitator: David A. Wheeler, is an expert in software development and computer security. He is the author of several books, including "Software Inspection: An Industry Best Practice" (IEEE CS Press) and "Secure Programming for Linux and Unix HOWTO". He has written many articles analyzing open source software/Free Software (OSS/FS), including "Why OSS/FS? Look at the Numbers!", "More than a Gigabuck: Estimating GNU/Linux's Size", and "How to Evaluate OSS/FS Programs".

A Workshop On Full Cost Accounting Methodology For Information Technology Projects In The Public Sector

CONFERENCE MANAGEMENT SERVICES

If you are an organization that does not have the time or money to produce an event for your community, but you see the great

benefits of providing such opportunities please call us at 613.226.8317 to learn how we can help you.

HOW TO BUILD YOUR EVENT TEAM

Bringing a team of people will ensure you understand the changes, innovations, and challenges in the industry and the impact this information could have on your goals. To help you do this we have included a team discount structure for delegates registering from the same organization at the same time.

- Teams of 3 receive a 5% discount on the registration fees for each participant
- Teams of 5 receive a 10% discount on the registration fees for each participant
- Teams of 7 receive a 15% discount on the registration fees for each participant
- For larger teams please call 613-226-8317

*not valid with any other offer

OUR UNCONDITIONAL UPGRADE POLICY

If you have registered for a similar event and wish to upgrade to this event instead, we are so sure that you will find this event of more value that we will refund any cancellation fee up to \$200!

REGISTER BY PHONE FAX OR EMAIL:

Phone: 1-613-226-8317

Fax: 1-613-226-8421 *24 hours a day

Mail: Verney Conference
Management
20 Jamie Ave, 2nd Floor
Ottawa, ON, Canada K2E 6T6

Email: registration@verney.ca

Web: www.governmentevents.ca

IMPORTANT! To speed up your registration be sure to fill out the priority code associated with how you found out about this event – even if it was not originally intended for you.

Make cheques payable to:
Verney Conference Management
Forum Registration Fee
\$1199.00 + 7%GST = \$1282.93

Forum + 1 Additional Half-day Workshop
\$1499.00 + 7%GST = \$1603.93

Forum + 2 Additional Half-day Workshops
\$1699.00 + 7%GST = \$1817.93

Payment is due prior to the conference and includes lunches, refreshments, a detailed conference workbook as well as all meeting materials available during the conference. Every effort will be made by Verney Conference Management to ensure that all speaker materials will be included in the workbook, however speakers do reserve the right to not have their materials distributed or included in the workbook. If registering less than two weeks prior to an event a credit card hold will be required or a valid government purchase order number with applicable contact information. Verney Conference Management will only process credit card holds for payment if full payment is not received within the two weeks immediately following this event.

Cancellation and Substitution Policy:

You may substitute delegates at any time, however you are not permitted to split one registration between two or more individuals.

In the event that you need to cancel your registration, Verney Conference Management will refund your payment, less a 10% service charge for cancellations received in writing 6-10 business days prior to first day of the event. For cancellations received 11 days or more prior to an event, you may choose to receive a 100% refund or a credit note to be used up to one year from the date of issuance. There will be no refunds or credit notes issued for cancellations received 5 business days or less prior to a conference. If a registered delegate fails to cancel and does not attend the event, this will be treated as a cancellation and no refunds or credit notes will be issued.

Agenda Alterations, Postponements, and Speaker Substitutions:

Please note that speakers and topics were confirmed at time of publishing, however, circumstances beyond the control of Verney Conference Management may require substitutions, alterations, or cancellations of speakers and/or topics. Therefore, Verney Conference Management reserves the right to alter or modify the advertised speakers, topics, and/or agenda if necessary. If Verney Conference Management is required to postpone an event, a credit note will be issued and considered as a registration for the rescheduled event and will be subject to the standard policies previously outlined. If Verney Conference Management is required to cancel an event a full refund will be issued or you may choose to be issued a credit note for a future event to be used within one year of issuance.

Verney Conference Management shall assume no liability whatsoever in the event this conference is cancelled, rescheduled, or postponed due to fortuitous event, "Act of God", unforeseen occurrence, or any other event that renders the performance of this conference impractical or impossible.

Verney Conference Management reserves the right to make changes to speakers, and programs and/or cancel programs if enrollment criteria is not met or when conditions out of its control prevail. Every effort will be made to contact each participant if a program is canceled or postponed. If a program is cancelled Verney Conference Management's liability shall be limited to the refund of conference registration fees only.

Lodging And Conference Location Information:

Sessions for the conference and workshops will be held at:

Ottawa Congress Centre
55 Colonel By Drive, Ottawa, ON K1N 9J2
P: 800.450.0077 F: 613.563.7646

If you are coming to this event from out of town we suggest that you stay in style. Verney Conference Management has negotiated a preferred rate on your behalf at:

Les Suites Hotel Ottawa
130 Besserer St., Ottawa ON K1N 9M9
P: 800.267.1989 F: 613-232-1242

You must mention this booking code in order to reserve your special rate: VERNEY0308

* This preferred rate is subject to availability with a cut-off date of Friday February 6/2004

AIR CANADA

Air Canada is the official carrier for this event. In conjunction with this meeting, special rates on airfare anywhere in Canada are available. Call Air Canada at 1-800-361-7585 or your travel agent and refer to event number CV042350.
